Calmlee App Encryption Registration Supplement No. 5 to Part 742

(1) Point of Contact Information

     (a) Eric Andrew Meadows

     (b) +19377761657

     (c)

     (d) eric@calmlee.com

     (e) 1290 Sharon Park Drive, Unit 53, Menlo Park, CA 94025

(2) Calmlee is a small California-based company producing software apps around stress management.  Our main use of encryption is the standard SSL (https), SSH, etc.  This encryption will be used for data transmissions, server connectivity, and privacy information.  You can learn more about us at https://www.calmlee.com/

(3) We Produce

     (b) Mobile applications

     (j) Software

        (ii) Applications

(4) Our products use standard off the shelf encryption libraries and tools, such as https (SSL).  We don't develop or intend to develop any proprietary encryption mechanisms.

(5) We don't plan on exporting "encryption source code".

(6) Calmlee App uses the iPhone and PHP to transmit information using https encrypted communication.  This is provided by Apple.  I understand that Apple uses OpenSSL which is an open source project and thus may have contributions from all around the world.

(7) We produce software, so, no manufacturing processes are involved.  All of our software is produced in the United States.  The reason for this application is to distribute an app through Apple's App store.
